

Crowd-Funding Web app

Crowd-funding is the practice of funding a project or venture by raising small amounts of money from a large number of people, typically via the Internet.

Crowdfunding is a form of crowdsourcing and alternative finance. In 2015, over US\$34 billion was raised worldwide by crowdfunding. (From Wikipedia)

The aim of the project: Create a web platform for starting to fundraise projects in Egypt.

The web app should include the following features:

1 - Authentication System:

- Registration:

- First name
- Last name
- Email
- Password
- Confirm password
- Mobile phone [validated against Egyptian phone numbers]
- Profile Picture

- Activation Email after registration

- Once the user register, he should receive an email with the activation link. The user shouldn't be able to login without activation. The activation link should expire after 24 hours.

- Login

- The user should be able to login after activation using his email and password
- Bonus: Allow users to login with facebook account

- Forgot Password (Bonus)

- The user should have an option to reset his password if he forgot it to receive a password reset link to his email

- User Profile, The user can view his profile which:

- He can view his profile
- He can view his projects
- He can view his donations
- He can edit all his data except for the email
- He can have extra optional info other than the info he added while registration (Birthdate, facebook profile, country)
- User can delete his account (Note that there must be a confirmation message before deleting)
 - **Bonus:** User must enter his password to delete his account

2 - Projects:

- The user can create a project fund raise campaign which contains: -

Title

- Details
- Category (from list of categories added previously by admins)

Multiple pictures

- Total target (i.e 250000 EGP)

Multiple Tags

- Set start/end time for the campaign

- Users can view any project and donate to the total target
- Users can add comments on the projects
- **Bonus:** Comments can have replies
- Users can report inappropriate projects
- Users can report inappropriate comments

- Users can rate the projects
- Project creator can cancel the project if the donations are less than 25% of the target
- Project page should show the overall average rating of the project
- Project page should show the project pictures in a slider
- Project page should show 4 other similar projects based on project tags.

3 - Homepage should contains the following:

- A slider to show the highest five rated running projects to encourage users to donate
- List of the latest 5 projects
- List of latest 5 featured projects (which are selected by the admin) - A
- list of the categories. User can open each category to view its projects
- Search bar that enables users to search projects by title or tag

Similar Projects to get some inspiration :)
